

1 in 8 Vietnamese people is at high risk of **liver cancer...**

1 in 8 VIETNAMESE PEOPLE HAS HEPATITIS B

Many don't know that they have it. Hepatitis B can cause liver cancer when left untreated. Liver cancer is the fastest growing cause of cancer death in Australia.

Find out if you or your family has hepatitis B. **Get you and your family tested.**

1. **GET TESTED**

Do you have it?

2. **If NO - GET VACCINATED**

Vaccination is FREE for you if any of your loved ones has hepatitis B. Vaccination will protect you and your family from hepatitis B.

3. **If YES - GET REGULAR CHECKUPS**

If you have hepatitis B, get regular check ups and treatment with your doctor.

Taking action today will protect you and your family from liver cancer. Talk to your doctor today!
